POWER CHIPS PUBLIC LIMITED COMPANY

Gibraltar Registered No. 60528

DIRECTORS' REPORT

The directors submit their report and the audited financial statements for the year ended 31 March 2011.

Corporate Profile

The Company was incorporated on 11 February 1997 in Gibraltar. The Company's shares are publicly traded in the United States over-the-counter (OTC) market and quoted as PWCHF on the Pink Sheets at www.pinksheets.com.

Activities

The principal activity of the Company is that of researching, developing and marketing Power Chips™ Technology. Power Chips are devices that absorb heat and use it to produce electrical power. They are silent, non-polluting, scalable, portable, and can operate anywhere there is a source of heat. We expect them to replace many existing technologies for generating electricity. With Avto Metals™, and the ability to control Electron Volt (Ev) our technical staff is quite confident that we can make a commercially viable product. As we take no government funding, because we wish to make a serious return on our substantial expenditures to date, our funding efforts to date have been very slow and painful. Our Technical Staff are confident that with an investment of US\$10 million we can make working prototypes of Power Chips™ with at least 20% of Carnot efficiency.

Results and Review of Business

The results for the year are shown in the Profit and Loss Account on page 9.

Power Chips plc lost \$280,000 this year. This compares to our loss of \$330,000 in 2010. Our cumulative loss carry forward is now \$1,918,451 compared to \$1,638,451 in 2010.

Power Chips plc is a member of the Borealis Family of Companies and is a publicly traded indirect majority-owned subsidiary of Borealis Exploration Limited. Borealis Technical Limited, our direct parent company, owns 5,209,983 of our 8,035,118 outstanding shares, or 64.84% of our shares. Like our parent and most Family companies, Power Chips plc is incorporated in Gibraltar. Power Chips plc owns almost ten million Asamera Limited shares which has the license for stationary power units of over 1 Mega Watt and may obtain other rights to Power Chips™ as we plan on using Asamera Limited as the funding vehicle for Power Chips plc.

Our parent company, Borealis Technical Limited, owes us \$3,551,109 compared to \$3,831,109 in the previous year.

Borealis Technical Limited ("Technical"), the parent company, has conducted basic industrial research on its Power Chips technology since 1996, for which it has patents issued and pending. All of the research expenditures to this year that have been undertaken by Technical are funded by Borealis Exploration Limited, the ultimate parent of the Company. Technical had received deposits in prior years on behalf of the Company towards the issue of shares in the Company which deposits were then due back to Power Chips plc. During FY2011, the Company was charged Consulting and Development Fees of \$280,000 (\$330,000 – 2010).

An Intellectual Property Agreement was signed effective 1 January 1999, whereby Technical has granted the Company the exclusive worldwide rights for sublicensing the Power Chips technology. In consideration for the rights granted to the Company, the Company shall pay Technical an 8% royalty based on net sales of licensed products and services sold by the Company and 50% of all sublicense income. To date the Power Chips technology is still under development such that the Company has not

POWER CHIPS PUBLIC LIMITED COMPANY

DIRECTORS' REPORT (Continued)

made any related sublicense sales. Power Chips plc has licensed Avto Metals plc technology for use in making Power Chips.

We seem to be in constant negotiations to sell licenses and product using various corporate structures under favourable terms for all parties involved. Power Chips plc has issued one licence to Asamera Limited and may issue others. It now appears that selling shares in Asamera Limited and in Power Chips plc will be the most practical means to procure the funds to be a manufacturer and supplier of Power Chips to most of our markets including the high value market. Under NDA Business Plans are available.

The Company has been in the development stage since its inception. The Company intends to retain its sublicense rights granted by Technical. These financial statements have been prepared in accordance with generally accepted accounting principles with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. From inception to 31 March 2006, the Company lent money raised on its behalf to Technical and Borealis Exploration Limited, who are also in a development stage. Now the Company is being charged for management and project fees, and is also paying its direct costs of research. The economic climate circumstances raise doubts about the ability of the Company to continue as a going concern. The Company is a publicly traded company.

Management of the Company has indicated they have no intention to demand repayment of the amounts owing from Technical until the Power Chips technology is being licensed in the marketplace. The Company and Technical are actively working together to negotiate sales or further sublicensing of its technology to various parties, which is expected to generate profitable operations in the future. To the extent additional funds are required, the Company will attempt to raise these funds through future sales of licences, of products, sale of shares in Asamera Limited and the sale of further shares of the Company. There can be no assurance that the Company will be successful in its actions. The financial statements do not contain any adjustments that might be necessary if the Company is unable to continue as a going concern.

Dividends

There were no dividends declared during the year.
